RIDER ISLE

Mixer channel	Name	Snake out XLR
1	Beats L	A1
2	Beats R	A2
3	Bass synth	A3
4	Bass DI	B5
5	Instruments + Tracks L	A5
6	Instruments + Tracks R	A6
7	Accoustic guitar DI	B1
8	Electric guitar amp	B2
9	Loops L	A7
10	Loops R	A8
11	Vocal Lise	B3
12	Vocal Arjan	B4
13	Motion sensor FX L	B7
14	Motion sensor FX R	B8

Sound - <u>please provide the following</u>:
- 230V schuko power strips (highlighted in green on plot plan)
- Stagebox/snake -> we supply 3 meter snakes directly from the rack on the middle of the stage - 14 channels
- Front of house mixer to support 14 channels
- PA sound amplification system suitable for the event. Make sure the system can deliver low end frequencies (ISLE uses sub-bass and kickdrum sounds)
- Use subtle reverb on vocals and acoustic guitar

Sound - what we bring ourselves:
- Mics, DI's, stands and cabling for going into our 19" rack.
- Instruments, guitar amp
- In-ears, no monitor mix required.
- Hand motion sensor through which Lise controls vocal FX (channel 13 & 14 on patch list)

Light - <u>please provide the following</u>:
- Front lights: 4 Fresnels /spot lights with barn doors, to enlighten 4 positions
- Hazer: subtly keep the stage area filled with haze to support the LED PARs

Light - what we bring ourselves:
- We bring 8 LED bars which will show a fully automated visual spectacle coming from the back of the stage. The light show is synced with the music.
- We bring 12 LED PARs that are synced with the music
